- Problem Solving and Troubleshooting

WORK HISTORY

Full Stack Developer | Moat Academy, [Lagos state]
| Oct 2023 - Present

- Collaborated with a team of developers to design and implement a scalable and responsive web application using React.js, JavaScript and AJAX for the front end and PHP for the back end.

- Integrated third-party APIs to enhance application functionality and user experience.

- Implemented and maintained RESTful APIs for seamless communication between the front end and back end.

- Conducted code reviews to ensure code quality and adherence to best practices.

RECENT PROJECTS

- **Z-work Marketplace**   [Check Project here](#)

Built on a foundation of cutting-edge technologies including Object-Oriented Programming (OOP), PHP, AJAX, jQuery, JavaScript, CSS, and Bootstrap, this platform represents a fusion of innovation and functionality.

Here's a glimpse into what was achieved:

🌟 Features Spotlight 🌟

For Freelancers:

- Robust Profile Creation: Empower freelancers to showcase their skills and expertise effectively.
- Smart Job Search Filters: Enhance user experience with intuitive job search filters tailored to their preferences.
- Secure Communication Channels: Implement secure messaging functionalities for transparent client communication.
- Payment Integration: Ensure seamless and secure payment transactions for freelancers' peace of mind.

For Clients:

- Effortless Job Posting: Provide clients with a streamlined process to post their projects and connect with top-tier talent.
- Talent Discovery: Enable clients to browse through a diverse pool of skilled freelancers to find the perfect fit for their projects.
- Proposal Management: Simplify the process of reviewing and managing proposals to expedite project kick-off.
- Milestone-based Payments: Facilitate transparent transactions through milestone-based payment systems, ensuring mutual trust and satisfaction.
