Summary

Technical Skills:

- Object Oriented Programmer (OOP)
- Programming Languages: PHP, JavaScript, HTML, CSS
- Frameworks: Laravel
- Database Management: MySQL, MongoDB
- Version Control: Git
- RESTful APIs

Career highlight/Experience:

PHP Developer at Moat Academy;

- Designed and developed backend systems using PHP frameworks such as Laravel.
- Collaborated with frontend developers to integrate server-side logic with user-facing elements.
- Optimized database queries and implemented caching mechanisms to improve application efficiency.
- Implemented RESTful APIs for seamless communication between frontend and backend systems.

Projects:

- Freelance Marketplace;
Built a freelance marketplace where freelancers with skills can get jobs and earn using OOP and all backend programming was done with PHP, featuring user authentication, chatting feature between client and freelancer, admin dashboard to manage and view users of the app, and secure payment processing.

Experience

Full Stack Engineer
Moat Academy for Developers
Oct 2023 - Present (5 months)

Customer Relations Manager
AMX1
Aug 2020 - Oct 2021 (1 year 3 months)
I desired to gain special skills in relating with customers and helping them solve issues quickly. So I applied and got a job in the field. Customer's satisfaction was the inn thing I always wanted anytime I was attending a customer. I took the business as my own and I gained and learned how to relate with customers better.

Computer Engineer

KayTech Computers

Feb 2017 - Nov 2018 (1 year 10 months)

I worked and learnt how to

professionally use a computer system, design tech products and also learnt computer
engineering to gain the skill of trouble-shooting at kaytech computer. I worked as a product Designer for
kaytech computer.
